Re: Myers Plumbing and Heating, Letter of recommendation

To whom it may concern,

My name is Kelley Kuehne and work for Centurion Medical Products Corp. In addition to other duties, I served as the owner's representative and project manager for a recent construction project. Our project lasted approximately 18 months and we are now occupying our new corporate headquarters in Williamston, MI.

Myers Plumbing and Heating was selected to perform the work for all HVAC and plumbing work. My experience with Myers' ownership, project managers and, most importantly, project foremen has been extremely positive.

As it goes with all construction projects, nothing goes exactly according to plan. Myers was willing and able to put forth the extra effort it takes to resolve not only HVAC and plumbing issues, but also helped lead coordination efforts between trades. In doing so, Myers offered input along the way with regard to design improvements as well as offering their opinion when something was perhaps "over designed". Their input was welcome and much appreciated. It is their hands-on, real world experience that I value most.

The quality and thoroughness of their work is top notch. At the end of the project, there was very little punch list work to complete. While minimal, these tasks are to be expected and Myers handled them immediately and professionally. Myers' responsiveness was very good throughout the project and continues as we learn about how our new building operates.

I hope that in writing this letter I've communicated how appreciative Centurion is in the job Myers has done. They were definitely one of the top contractors on our job. I believe that, as an organization, Myers is truly focused on customer satisfaction.

Regards,

Kelley Kuehne
